SEAWAY NOTICE NO. 10 - 2010

Maximum Permissible Draft – Montreal to Lake Ontario

Mariners are advised that given the significant precipitations in June and almost average precipitations over the Lake Ontario basin in July, the outflows have been increasing gradually and the water levels have improved on Lake St-Louis to above Cote Ste Catherine Lock. Consequently, **effective July 24, 2010** and until further notice, the **maximum permissible draft in the Montreal-Lake Ontario section will be increased to 80.8 dm (26'-6") for all vessels.** The transit conditions described in the Maisonneuve Region **Notice to Shipping no. 15 remain in effect.** Water levels will continue to be monitored closely and mariners will be advised of any changes accordingly.

July 23<sup>rd</sup>, 2010
