SEAWAY NOTICE NO. 11 - 2017

Critical Areas during High Flows (Cancelled 2017/08/23)

Based on feedback received from the mariners, the critical areas identified for no meeting or passing during the high flow conditions have been modified as follows:

- American Narrows, between Sunken Rock Shoal (U.S. LT 189) and Point Vivian
- Brockville Narrows, between Skelton Island and Needles Eye Island
- Wiley Dondero Canal, between CIP 9 (buoy 56) to mooring cells below Copeland Cut

Mariners are to adjust their speeds accordingly to accomplish this.

Mariners should exercise caution when navigating in areas of high cross currents such as Galop Island, Toussaint Island, Ogden Island, Copeland Cut and South Cornwall Channel (Polly's Gut).

Mariners are invited to provide feedback to the Traffic Control Centers on navigation conditions encountered due to the higher than normal outflows.

Thank you for your collaboration.
