

The Great Lakes - St. Lawrence Seaway System
Le réseau Grands Lacs - Voie maritime du Saint-Laurent

Seaway Notice N° 7 - 2015

Testing the Use of Soft Lines for Mooring in Locks for Ships not Greater than 200 Meters in Overall Length

The Seaway will continue to test the use of soft lines for mooring at locks on ships not greater than 200 m in OAL for the 2015 season. The ship operator or ship representative must make a request to Marine Services for the use of soft lines on ships between 150 and 200 meters prior to the ship's arrival at the Seaway. The mooring lines must be in good condition and they must comply with section #10 of the Seaway Practices and Procedures.

Attached is an evaluation form for the masters and pilots to provide comments. The form has to be sent as per the instructions at the bottom of the form.

This procedure will be reviewed on an ongoing basis to ensure that it continues to meet the needs of all interested parties.

Your cooperation is greatly appreciated.
