SEAWAY NOTICE NO. 11 – 2018

**Use of Engines to Proceed to a Vessel's Final Mooring Position (FMP)**

Vessels coming to a premature stop in the vicinity (within a few metres) of their final mooring position (or first stop position for full-sized downbound vessels in the Welland Canal) are encouraged to not use their engines to proceed to their FMP. The vessel should first be secured with the Hands-Free Mooring (HFM) units or mooring lines depending on the lockage type and then either advanced with HFM or winched to their FMP.
