SEAWAY NOTICE NO. 11 - 2019

Restrictions to Ship Inspections

In response to the high flows currently being experienced, the expertise of our ship inspectors is required in our Traffic Control Centers full time in order to respond questions from mariners. The ship inspectors' availability for performing ship inspections in the greater Montreal area will therefore be limited as per the following schedule. From Tuesday, June 11, until Sunday, June 23, ship inspections will be done Monday to Friday, during business hours only. Regular ship inspection services will be available starting Monday, June 24.
