2007 - NOTICE TO SHIPPING #8

NIAGARA REGION
WELLAND CANAL

LOW WATER LEVELS LAKE ONTARIO

Due to the lower water levels being experienced on Lake Ontario and the silting which has occurred in Port Weller Harbour, high spots are developing below Lock 1. Rather than reducing draft, the following procedure has been put in place:

Lock 1 – To North End of Wharf 2

Vessels whose drafts are greater than 7.77 metres (25'6") are to proceed at the slowest safe possible speed through the affected area.

John W. Chalmers
Senior Coordinator, Operations Support Services
St. Catharines, Ontario
