MAISONNEUVE REGION
MONTRÉAL / LAKE ONTARIO SECTION

Increase in Outflows at Moses-Saunders Dam

Mariners are advised that due to higher water levels on Lake Ontario, the Board of Control (ISLRBC) has decided to increase the outflows at the Moses-Saunders dam in Cornwall effective June 1st, 2011 until the levels of Lake Ontario have reach 75.32 m (IGLD85). Mariners are advised that this increase may cause variations in the normal current patterns and velocities, in particular in the vicinity of Iroquois Lock, Copelands Cut Light 46 and downstream of Snell Lock. Mariners will be advised once the levels have receded.
