SEAWAY NOTICE NO. 16 - 2021

SPEED MANAGEMENT CHANGES – PERMANENT

In March, the Seaway Notice No. 10 - 2021 SPEED MANAGEMENT CHANGES was issued. As a result, a noticeable improvement has been observed in better adherence to the speed limits, and we want to recognize the efforts of Captains and Pilots towards that goal.

Effective May 20, 2021 (00:01AM), the tighter speed management program will become permanent. This means the speed limits specified in the Seaway Handbook are to be followed, and deviations are to be short and strictly for safety of navigation. Although this applies in the entire Seaway system, this is especially the case for the areas mentioned in MLO's Notice to Shipping No.5 - 2021 VOLUNTARY SPEED REDUCTION PROGRAM IN SENSITIVE AREAS.

Thank you for your participation.
