

Notice to Shipping NO. 25 - 2021

MAISONNEUVE REGION
MONTREAL / LAKE ONTARIO SECTION

SPEED RESTRICTION ON LAKE ST-LOUIS - Revised

Current water levels on Lake St. Louis have increased. Consequently, the speed restrictions outlined in Notice to Shipping #21 of 2022 have been revised.

Mariners are advised that effective immediately, the speed limits between buoys A30 and A40 are as follows:

- Vessels with a draft greater than 70dm are limited to 11 knots upbound and 13 knots downbound. Please note, vessel speeds will be monitored closely.

For vessels with a draft of 70dm or less, the speed limit remains limited to 12 knots upbound and 14 knots downbound respectively.

Mariners are also cautioned to avoid meets between A30 and A40 when possible.

Should water levels decrease again, the tighter speed restrictions may re-instated. We will continue to monitor the conditions and advise accordingly.
