**JOINT PRACTICES AND PROCEDURES RESPECTING THE
TRANSIT OF SHIPS ON THE ST. LAWRENCE SEAWAY**
(U.S. Rules 401.1 to 401.97)

Short Title

1. These Practices and Procedures may be cited as the **Seaway Practices and Procedures**.

Interpretation

2. In these Practices and Procedures,

«**E-Business**» means web applications on The St. Lawrence Seaway Management Corporation web site which provides direct electronic transmission of data to complete and submit application forms and transit data;

«**Act**» in Canada means the *Canada Marine Act*; in the United States means the Saint Lawrence Seaway Act; (*Loi*)

«**Corporation**» means the Great Lakes St. Lawrence Seaway Development Corporation; (*Corporation*)

«**fees**» is defined in the *Canada Marine Act* and includes "Toll(s)" or "tolls and charges" as used in the United States;

«**flashpoint**» means the lowest temperature of a flammable liquid at which its vapour forms an ignitable mixture with air as determined by the closed-cup method; (*point d'éclair*)

«**Hands Free Mooring**» (HFM) means a system that uses vacuum pads that are mounted on vertical rails inside the lock chamber wall to secure a ship during the lockage process;

«**Manager**» means The St. Lawrence Seaway Management Corporation; (*gestionnaire*)

«**navigation season**» means the annual period designated by the Manager and the Corporation, that is appropriate to weather and ice conditions or ship traffic demands, during which the Seaway is open for navigation; (*saison de navigation*)

«**officer**» means a person employed by the Manager or the Corporation to direct some phase of operation or use of the Seaway; (*agent*)

«**passing through**» means in transit through a lock or through the waters enclosed by the approach walls at either end of a lock chamber; (*éclusage*)

«**pleasure craft**» means a ship, however propelled, that is used exclusively for pleasure and that does not carry passengers who have paid a fare for passage; (*embarcation de plaisance*)

«**preclearance**» means the authorization given by the Manager or the Corporation or a ship to transit; (*congé préalable*)

«**representative**» means the owner or charterer of a ship or an agent of either of them and includes any person who, in an application for preclearance of a ship, accepts responsibility for payment of the fees to be assessed against the ship in respect of transit and wharfage; (*représentant*)

«**Schedule of Tolls**» means the same as "Tariff of Tolls" in the United States; (*tarif des droits*)

«**Seaway**» means the deep waterway between the Port of Montreal and Lake Erie and includes all locks, canals and connecting and contiguous waters that are part of the deep waterway, and all other canals and works, wherever located, the management, administration and control of which have been entrusted to the Manager or the Corporation; (*voie maritime*)

«**Seaway station**» means a radio station operated by the Manager or the Corporation; (*station de la voie maritime*) (Refer to section 62 – Seaway Stations)

«**Ship**» means every description of ship, boat or craft designed, used or capable of being used solely or partly for marine navigation, whether self-propelled or not and without regard to the method of propulsion, and includes a sea-plane and a raft of logs or lumber; (*navire*)

«**ship traffic controller**» means the officer who controls ships traffic from a Seaway station; (*contrôleur du trafic maritime*)

«**Tariff of Tolls**» in the United States means the same as Schedule of Tolls in Canada; (*tarif des droits*)

«**tanker**» means any ship specifically constructed for carrying bulk cargoes of liquid petroleum products, liquid chemicals, liquid edible oils and liquefied gases in tanks which form both an integral part and the total cargo carrying portion of that ship; (*navire-citerne*)

«**towed**» means pushed or pulled through the water; (*remorqué*)

«**transit**» means to use the Seaway, or a part of it, either upbound or downbound; (*transiter*)

«**vessel**» is used in U.S. Seaway Regulations only and means any type of craft used as a means of transportation on water;

«**vessel traffic controller**» is used in U.S. Seaway Regulations and has the same meaning as **Ship traffic controller**).

PART I - CONDITION OF SHIPS

Maximum Ship Dimensions

3. (1) Subject to subsection (5), no ship of more than 222.5 m in overall length or 23.2 m in extreme breadth shall transit.
- (2) No ship shall transit if any part of the ship or anything on the ship extends more than 35.5 m above water level.
- (3) No ship shall transit if any part of its bridges or anything on the ship protrudes beyond the hull.
- (4) No ship's hull or superstructure when alongside a lock wall shall extend beyond the limits of the lock wall, as illustrated in Appendix I.
- (5) A ship having a beam width in excess of 23.2 m but not more than 23.8 m and having dimensions that do not exceed the limits set out in the block diagram illustrated in Appendix I, or overall length in excess of 222.5 m but not more than 225.5 m shall, on application to the Manager or the Corporation, be considered for transit after review of the ship's drawings and, if accepted, shall transit in accordance with directions issued by the Manager and the Corporation.
- (6) Ships beam greater than 23.20 m may be subject to transit restrictions and/or delays during periods of ice cover.

Minimum Length and Weight

4. No ship of less than 6 m in overall length or 900 kg in weight shall transit through Seaway Locks.

Required Equipment

5. No ship shall transit unless it is
 - (a) propelled by motor power that is adequate in the opinion of an officer; and
 - (b) marked and equipped in accordance with the requirements of sections 6 to 21.

Markings

6. (1) Ships of more than 20 m in overall length shall be correctly and distinctly marked and equipped with draught markings on both sides at the bow and stern.

- (2) In addition to the markings required by subsection (1), ships of more than 110 m in overall length shall be marked on both sides with midship draught markings.
- (3) Where a ship's bulbous bow extends forward beyond her stem head, a symbol of a bulbous bow shall be marked above the ship's summer load line draught mark in addition to a + symbol followed by a number indicating the total length in metres by which the bulbous bow projects beyond the stem.

Fenders

- 7. (1) Where any structural part of a ship protrudes so as to endanger Seaway installations, the ship shall be equipped with only horizontal permanent fenders
 - (a) that are made of steel, are of a thickness not exceeding 15 cm, with well tapered ends, and are located along the hull, close to the main deck level; and
 - (b) on special application, portable fenders, other than rope hawsers, may be allowed for a single transit if the portable fenders are
 - (i) made of a material that will float, and
 - (ii) securely fastened and suspended from the ship in a horizontal position by a steel cable or a fibre rope in such a way that they can be raised or lowered in a manner that does not damage Seaway installations.
- (2) Tires shall not be used as fenders.
- (3) On special application, ships of unusual design may be permitted to utilize permanent fenders not greater than 30 cm in thickness.

For details refer to Ship Transit and Equipment Requirements items 23 and 27.

Landing Booms

- 8. (1) Ships of more than 50 m in overall length and a freeboard of 2m or more shall either be equipped with landing booms or make their own provisions for tie-up at the approach walls.

For details refer to Ship Transit and Equipment Requirements, section 20.

- (2) For ships with landing booms:
 - (a) Ship must be equipped with an adequate landing boom on each side;
 - (b) Landing booms must be in compliance with applicable regulations;
 - (c) Ship's crews shall be adequately trained in the use of landing booms for the purpose of landing crew ashore.
 - (d) Ship must have onboard for inspection the following documents:
 - (i) A copy of the test certificates for each of the landing booms from either a classification society or a third party, **dated within 5 years**
 - (ii) Documents to demonstrate appropriate training;
 - (iii) Documented tests and maintenance records of landing boom equipment.
- (3) At the U.S. Locks, ships not equipped with or not using landing booms may be tied up at the approach walls based on Lock personnel availability.
- (4) At the Canadian Locks, ships not equipped with or not using landing booms should make alternate arrangements for tie-up at approach walls prior to commencing transit of the Seaway. Example: ship contract in place with a 3rd party service provider where ship is responsible for contacting provider.
 - (a) Ships that do not have a tie-up strategy in place for the lock approach walls may be delayed and/or put to anchor until such time that the traffic pattern can accommodate their transit.

Radio Telephone and Navigation Equipment

- 9. (1) Self-propelled ships, other than pleasure craft of less than 20 m in overall length, shall be equipped with VHF (very high frequency) radio telephone equipment.
 - (a) All communications shall be on the applicable VHF frequency. The use of personal electronic devices for communication between ships or with traffic control should be limited to necessity.
 - (b) Please note that communications into the Traffic Control Centre may be recorded for quality assurance and training purposes.

- (2) The radio transmitters on a ship shall
 - (a) have sufficient power output to enable the ship to communicate with Seaway stations from a distance of 48 km; and
 - (b) be fitted to operate from the conning position in the wheelhouse and to communicate on channels 11, 12, 13, 14, 15, 16, 17, 66a, 75, 76 and 77.
- (3) Gyro compass error greater than 2 degrees must be serviced prior to transiting the Seaway, if noted during a Seaway transit, it must be reported to the nearest Seaway station and the gyro compass must be serviced at first opportunity.

For details of section 9. (2) (b) refer to section 60 through 64.

Mooring Lines

10. (1) Mooring lines shall
 - (a) be of a uniform thickness throughout their length;
 - (b) have a diameter not greater than 28mm for wire line and not greater than 64mm for approved synthetic lines
 - (c) be fitted with a hand spliced eye or Flemish type mechanical spliced eye not less than 2.4 m long for wire lines and 1.8 m long spliced eye for approved synthetic lines;
 - (d) have sufficient strength to check the ship;
 - (e) be arranged so that they may be led to either side of the ship as required.
 - (f) be certified and a test certificate for each mooring line containing information on breaking strength, material type, elongation and diameter shall be available onboard for inspection.
- (2) Unless otherwise permitted by an officer, ships greater than 200 m shall only use wire mooring lines with a breaking strength that complies with the minimum specifications set out in the table to this section for securing a ship in lock chambers.
- (3) Notwithstanding the above, nylon line is not permitted.
- (4) Hand held synthetic lines if permitted by the Manager or Corporation shall meet the criteria in section (1) and shall have a minimum length of not less than 65 metres.

TABLE		
OVERALL LENGTH OF SHIPS	LENGTH OF MOORING LINE	BREAKING STRENGTH
40 m or more but not more than 60 m	110 m	10 MT
more than 60 m but not more than 90 m	110 m	15 MT
more than 90 m but not more than 120 m	110 m	20 MT
more than 120 m but not more than 180 m	110 m	28 MT
more than 180 m but not more than 225.5 m	110 m	35 MT
Elongation of synthetic lines shall not exceed 20%		

Fairleads

11. (1) Mooring lines shall
 - (a) be led at the ship's side through a type of fairlead or closed chock acceptable to the Manager and the Corporation;
 - (b) pass through not more than three inboard rollers that are fixed in place and equipped with horns to ensure that lines will not slip off when slackened and provided with free-running sheaves or rollers; and
 - (c) where the fairleads or closed chocks are mounted flush with the hull, be permanently fendered to prevent the lines from being pinched between the ship and a lock wall.
 - (d) When passing synthetic lines through a type of fairlead or closed chock acceptable to the Manager and the Corporation all sharp edges of the fairlead, closed chock and/or bulwark shall be rounded to protect the line from chafing or breakage.
- (2) Wire lines shall only be led through approved roller type fairleads.

Minimum Requirements - Mooring Lines and Fairleads

12. (1) Unless otherwise permitted by the officer the minimum requirements in respect of mooring lines which shall be available for securing on either side of the ship, winches and the location of fairleads on ships are as follows:
 - (a) ships of 100 m or less in overall length shall have at least three mooring lines – wires or synthetic hawsers, two of which shall be independently power operated and one if synthetic, may be hand held;

- (i) one line shall lead forward from the break of the bow and one line shall lead astern from the quarter and be independently power operated by winches, capstans or windlasses and lead through closed chocks or fairleads acceptable to the Manager and the Corporation; and
 - (ii) one synthetic hawser may be hand held or if wire line is used shall be powered. The line shall lead astern from the break of the bow through a closed chock to suitable bitts on deck for synthetic line or led from a capstan, winch drum or windlass to an approved fairlead for a wire line.
- (b) ships of more than 100 m but not more than 150 m in overall length shall have three mooring lines – wires or synthetic hawsers, which shall be independently power operated by winches, capstans or windlasses. All lines shall be led through closed chocks or fairleads acceptable to the Manager and the Corporation.
 - (i) one shall lead forward and one shall lead astern from the break of the bow and one lead astern from the quarter.
- (c) ships of more than 150 m but not more than 200 m in overall length shall have four mooring lines – wires or synthetic hawsers, which shall be independently power operated by winches.
 - (i) one mooring line shall lead forward and one mooring line shall lead astern from the break of the bow.
 - (ii) one mooring line shall lead forward and one mooring line shall lead astern from the quarter.
 - (iii) all lines shall be led through closed chocks or fairlead acceptable to the Manager and the Corporation.
- (d) ships of more than 200 m in overall length shall have four mooring lines – wires, independently power operated by the main drums of adequate power operated winches as follows:
 - (i) one mooring line shall lead forward and one mooring line shall lead astern from the break of the bow.
 - (ii) one mooring line shall lead forward and one mooring line shall lead astern from the quarter.
 - (iii) all lines shall be led through a type of fairlead acceptable to the Manager and the Corporation.
- (e) every ship shall have a minimum of two spare mooring lines

available and ready for immediate use.

- (2) Unless otherwise permitted by the officer the following table sets out the requirements for the location of fairleads or closed chocks for ships of 100 m or more in overall length:

TABLE		
OVERALL LENGTH OF SHIPS	FOR MOORING LINES Nos. 1 AND 2	FOR MOORING LINES Nos. 3 AND 4
100 m or more but not more than 180 m	Shall be at a location on the ship side where the beam is at least 90 % of the full beam of the ship.	Shall be at a location on the ship side where the beam is at least 90 % of the full beam of the ship.
more than 180 m but not more than 222.5m	Between 20 m & 50 m from the stem	Between 20 m & 50 m from the stern

Hand Lines

13. Hand lines shall
- (a) be made of material acceptable to the Manager and the Corporation, and
 - (b) be of uniform thickness and have a diameter of not less than 12 mm and not more than 18 mm and a minimum length of 30 m. The ends of the lines shall be back spliced or tapered.
 - (c) not be weighted or have knotted ends.

Anchors, Anchor Marking Buoys

14. (a) Every ship shall have their anchors cleared and ready to be released prior to entering the Seaway.
- (b) Every ship shall deploy the anchor marking buoy when dropping an anchor in Seaway waters (designated Seaway anchorages are exempt).
- (c) Every ship shall be equipped with operational anchor(s) suitably rigged for immediate release, holding and retrieval. Every ship shall be responsible for locating and retrieving any anchor deployed by the ship and shall do so as timely manner so as to not delay transits of ships.

For details refer to Ship Transit and Equipment Requirements, Section 19.

Stern Anchors

15. Every ship of more than 125 m in overall length, the keel of which is laid after January 1, 1975, shall be equipped with a stern anchor.

Every integrated tug and barge or articulated tug and barge unit greater than 125 m in overall length which is constructed after January 1, 2003 shall be equipped with a stern anchor.

For details refer to Ship Transit and Equipment Requirements, section 17.

Propeller Direction Alarms

16. Every ship of 1600 gross registered tons or integrated tug and barge or articulated tug and barge unit of combined 1,600 gross registered tons or more shall be equipped with
 - (a) propeller direction and shaft r.p.m. indicators located in the wheelhouse and the engine room; and
 - (b) visible and audible wrong-way propeller direction alarms, with a time delay of not greater than 8 seconds, located in the wheelhouse and the engine room, unless the ship is fitted with a device which renders it impossible to operate engines against orders from the bridge telegraph.

Pitch Indicators and Alarms

17. Every ship of 1,600 gross registered tons or integrated tug and barge or articulated tug and barge unit of combined 1,600 gross registered tons or more equipped with a variable pitch propeller shall be equipped with
 - (a) a pitch indicator in the wheelhouse and the engine room; and
 - (b) visible and audible pitch alarms, with a time delay of not greater than 8 seconds, in the wheelhouse and engine room to indicate wrong pitch.

Steering Lights

18. Every ship shall be equipped with
 - (a) a steering light located on the centreline at or near the stem of the ship and clearly visible from the helm; or
 - (b) two steering lights located at equal distances either side of the centreline at the forepart of the ship and clearly visible from the bridge along a line parallel to the keel.

Disposal and Discharge Systems

19. (1) Every ship not equipped with containers for ordure shall be equipped with a sewage disposal system enabling compliance with the *Vessel Pollution and Dangerous Chemicals regulations (Canada)*, the *U.S.*

Clean Water Act and the U.S. River and Harbor Act, and amendments thereto.

- (2) Garbage on a ship shall be
 - (a) destroyed by means of an incinerator or other garbage disposal device; or
 - (b) retained on board in covered, leak-proof containers, until such time as it can be disposed of in accordance with the provisions of the *Vessel Pollution and Dangerous Chemicals regulations (Canada), the U.S. Clean Water Act and the U.S. River and Harbor Act, and amendments thereto.*
- (3) No substance shall be discharged or disposed of onto a lock wall or tie-up wall by any means, including overboard discharge pipes.
- (4) Burning of shipboard garbage is prohibited between CIP2 & Cardinal and between CIP 15 & CIP 16.

Automatic Identification System

20. (1) Each of the following ships must use an Automatic Identification System (AIS) transponder to transit the Seaway:
 - (a) each commercial ship that requires pre-clearance in accordance with section 22 and has a 300 gross tonnage or greater, has a Length Over All (LOA) over 20 meters, or carries more than 50 passengers for hire; and
 - (b) each dredge, floating plant or towing ship over 8 meters in length, except only each lead unit of combined and multiple units (tugs and tows).
- (2) Each ship listed in paragraph (1) of this section must meet the following requirements to transit the Seaway:
 - (a) International Maritime Organization (IMO) Resolution MSC.74(69), Annex 3, Recommendation on Performance Standards for a Universal Shipborne AIS, as amended;
 - (b) International Telecommunication Union, ITU-R Recommendation M.1371-5: 2014, Technical Characteristics For A Universal Shipborne AIS Using Time Division Multiple Access In The VHF Maritime Mobile Band, as amended;
 - (c) International Electrotechnical Commission, IEC 61993-2 Ed.3, Maritime Navigation and Radio Communication Equipment and Systems –AIS – Part 2: Class A Shipborne Equipment of the

Universal AIS – Operational and Performance Requirements, Methods of Test and Required Test Results, as amended;

- (d) International Maritime Organization (IMO) Guidelines for Installation of Shipborne Automatic Identification System (AIS), NAV 48/18, 6 January 2003, as amended, and, for ocean ships only, with a pilot plug, as specified in Section 3.2 of those Guidelines, installed close to the primary conning position in the navigation bridge and a power source accessible for the pilot's laptop computer; and
- (e) The Minimum Keyboard Display (MKD) shall be located as close to the primary conning position and be visible;
- (f) Computation of AIS position reports using a Satellite Based Augmentation System (SBAS); or
- (g) The use of a temporary unit meeting the requirements of subparagraphs (2) (a) through (f) of this section is permissible; or
- (h) For each ship with LOA less than 30 meters, the use of portable AIS compatible with the requirements of subparagraphs (2)(a) through (c) and subparagraphs (e) and (f) of this section is permissible.

Requirements for U.S. Waters of the St. Lawrence Seaway

- 21. In addition to the requirements set forth elsewhere in these Practices and Procedures, ships transiting the U.S. waters of the St. Lawrence Seaway are subject to the requirements set out in Schedule 1.

PART II - PRECLEARANCE AND SECURITY FOR FEES

Preclearance of Ships

- 22. (1) No ship, other than a pleasure craft of 300 gross registered tonnage or less, shall transit until an application for preclearance has been made, in accordance with section 24 to the Manager by the ship's representative and the application has been approved by the Manager and the Corporation pursuant to section 25.
- (2) No ship shall transit while its preclearance is suspended or has terminated by reason of
 - (a) the expiration of the representative's guarantee of fee payment,
 - (b) a change of representative of the ship,

- (c) a material alteration in the physical characteristics of the ship, until another application for preclearance has been made and approved, or
 - (d) past due invoices by the representative as set out in subsection 75(1).
- (3) Unless otherwise permitted by an officer a non-commercial ship of 300 gross registered tonnage or less cannot apply for pre-clearance status and must transit as a pleasure craft.

Liability Insurance

23. (1) It is a condition of approval of an application for preclearance that the ship is covered by liability insurance equal to or exceeding \$100 per gross registered ton.
- (2) No ship shall transit while its liability insurance is not in full force and effect.

Application for Preclearance

24. (1) The representative of a ship may apply for preclearance by completing and submitting the e-business preclearance form on the St. Lawrence Seaway website (www.greatlakes-seaway.com), giving particulars of the ownership, liability insurance and physical characteristics of the ship and guaranteeing payment of the fees that may be incurred by the ship.

Preclearance application must be submitted via the e-business site to the St. Lawrence Seaway at least 24 hours prior to ship arrival. They will be reviewed and approved between 08:00 – 16:00 hours Monday through Friday excluding holidays.

- (2) For representatives benefiting from the exemption of security of tolls as set out in subsection 26(3) and 26(4), a continuous preclearance status may be assigned to all ships under their responsibility. Validation of the continuous preclearance status will be required every 5 years.
- (3) For representatives with a valid security for fees and a good payment history as set out in subsection 26(3) and 26(4), a continuous preclearance status may be assigned to all ships under their responsibility. Validation of the continuous preclearance status will be required every year.
- (4) In the event that a ship under the representative's responsibility is modified or upgraded, an application for preclearance will be required to update the ship's information and reset the ship's preclearance status.

Approval of Preclearance

25. Where the Manager and the Corporation approve an application for preclearance, it shall
- (a) give the approval; and
 - (b) assign a number to the approval.

Security for fees

26. (1) Before transit by a ship to which the requirement of preclearance applies, security for the payment of fees in accordance with the *St. Lawrence Seaway Schedule of Tolls* as well as security for any other charges, shall be provided by the representative by means of
- (a) a deposit of money with the Manager;
 - (b) a letter of guarantee to the Manager given by a financial institution approved by the Manager; or
 - (c) a letter of guarantee given to the Manager by an acceptable Bonding Company. Bonding companies may be accepted if they:
 - i) appear on the list of acceptable bonding companies as issued by the Treasury Board of Canada; and
 - ii) meet financial soundness requirements as may be defined by the Manager (or the Corporation) at the time of the request.
- (2) The security for the fees of a ship shall be sufficient to cover the fees as established in the "*St. Lawrence Seaway Schedule of Tolls*" for the gross registered tonnage of a ship, cargo carried, lockage tolls as well as security for any other charges, as estimated by the manager.
- (3) Where a number of ships:
- (a) for each of which a preclearance has been given;
 - (b) are owned or controlled by the same individual or company; and
 - (c) have the same representative,
- the security for the fees may not be required if the individual, company or representative has paid every fee invoice received in the preceding five years within the period set out in subsection 75(1).
- (4) Notwithstanding subsection (3) of this section, where a number of ships, for each of which a preclearance has been given, are owned or controlled by the same individual or company and have the same

representative, the security for the fees may be reduced or eliminated provided the representative has paid every fees invoice received in the preceding five years within the period set out in subsection 75(1). Upon request from the Manager, the representative must provide the Manager with a financial statement that meets the requirements established by the Manager.

- (5) Where, in the opinion of the Manager, the security provided by the representative is insufficient to secure the fees incurred or likely to be incurred by a ship, the Manager may suspend the preclearance of the ship.

PART III - SEAWAY NAVIGATION

Compliance with Instructions

27. Every ship shall comply promptly with transit instructions given by the traffic controller or any other officer.

Speed Limits

28. (1) The maximum speed over the bottom for a ship of more than 12 m in overall length shall be regulated so as not to adversely affect other ships or shore property, and in no event shall such a ship proceeding in any area between a place set out in column I of an item of Schedule II and a place set out in column II of that item exceed the speed set out in column III or column IV of that item, whichever speed is designated by the Manager and the Corporation in a Seaway Notice from time to time as being appropriate to existing water levels.
- (2) Where the Manager or the Corporation designates any speed less than the maximum speeds set out in Schedule II, that speed shall be transmitted as transit instructions referred to in section 27.
- (3) Every ship under way shall proceed at a reasonable speed so as not to cause undue delay to other ships.
- (4) Every ship passing a moored ship or equipment working in a canal shall proceed at a speed that will not endanger the moored ship, the moored equipment or the occupants of either.
- (5) Notwithstanding the above speed limits, every ship approaching a free standing lift bridge shall proceed at a speed so that it will not pass the Limit of Approach sign should the raising of the bridge be delayed.

Maximum Draught

29. (1) Notwithstanding any provision herein, the loading of cargo, draught and speed of a ship in transit shall be controlled by the master, who shall take into account the ship's individual characteristics and its tendency to

list or squat, so as to avoid striking bottom. (*The main channels between the Port of Montreal and Lake Erie have a controlling depth of 8.23 m.*)

For details refer to Ship Transit and Equipment Requirements, Section 18.

- (2) The draught of a ship shall meet minimum draft requirement as defined at inspection on the Enhanced Ship Inspection form and not, in any case, exceed 79.2 dm or the maximum permissible draught designated in a Seaway Notice by the Manager and the Corporation for the part of the Seaway in which a ship is passing.
- (3) Any ship will be permitted to load at an increased draught of not more than 7 cm above the maximum permissible draught in effect as prescribed under 29 (2) if it is equipped with a Draught Information System (DIS) and meets the following:
 - (a) An operational Draught Information System (DIS) approved by a member of the International Association of Classification Societies (IACS) as compliant with the Implementation Specifications found at www.greatlakes-seaway.com and having onboard;
 - (i) An operational AIS with accuracy approved by the Seaway; and
 - (ii) Up-to-date electronic charts; and
 - (iii) Up-to-date charts containing high resolution bathymetric data; and
 - (iv) Ships must be equipped with a bow thruster and bow thruster must be operational.
 - (b) The DIS Tool Display shall be located as close to the primary conning position and be visible and legible.
 - (i) Verification document of the DIS must be kept on board the ship at all times and made available for inspection;
 - (ii) DIS license to use the software must be valid;
 - (iii) A company letter attesting to officer training on use of the DIS must be kept on board and made available for inspection;
 - (iv) When transiting Seaway waters with the DIS, a trained officer on the use of the DIS must be on the bridge;

- (v) Any ship intending to use the DIS for the first time must notify the Manager or the Corporation in writing at least 24-hours prior to commencement of its initial transit in the System with the DIS in order to arrange for appropriate testing for approval to use the DIS;
- (vi) Every navigation season any ship intending to use an approved DIS to transit the System must submit a completed confirmation checklist found at www.greatlakes-seaway.com to the Manager or the Corporation prior to its initial transit of the season;
- (vii) If for any reason the DIS, AIS, or bow thruster becomes inoperable, malfunctions or is not used while the ship is transiting at a draught greater than the maximum permissible draught prescribed under 29 (2) in effect at the time, the ship must notify the Manager or the Corporation immediately.

Ballast Water and Trim

30. (1) Every ship shall be adequately
- a) ballasted,
 - b) trimmed, and
 - c) no ship, other than under exceptional circumstances and with special permission, shall be accepted for transit whose trim by the stern exceeds 45.7 dm.
 - d) any ship that is not adequately ballasted and trimmed in the opinion of an officer may be refused transit or may be delayed.
 - e) As a condition of transit of the Seaway after having operated outside the exclusive economic zone (EEZ) every ship that carries only residual amounts of ballast water and/or sediment that were taken onboard the ship outside the EEZ shall:
 - (i) conduct a saltwater flushing of their ballast water tanks that contain the residual amounts of ballast water and/or sediment in an area 200 nautical miles from any shore before entering waters of the Seaway. Saltwater flushing is defined as the addition of mid-ocean water to ballast water tanks: the mixing of the flush water with residual water and sediment through the motion of the ship; and the discharge of the mixed water, such that the resultant residual water remaining in the tank has as high salinity as possible, and is at least 30 parts per thousand (ppt).

The ship shall take on as much mid-ocean water into each tank as is safe (for the ship and crew) in order to conduct saltwater flushing. And adequate flushing may require more than one fill-mix-empty sequence, particularly if only small amounts of water can be safely taken onboard at one time. The master of the ship is responsible for ensuring the safety of the ship, crew and passengers.

Ships reporting only residual ballast water onboard shall take particular care to conduct saltwater flushing on the transit to the Great Lakes so as to eliminate fresh or brackish water residuals in ballast tanks; and

- (ii) maintain the ability to measure salinity levels in each tank onboard the ship so that final salinities of at least 30 ppt can be ensured.
 - f) Every tank that is found not in compliance with 30(e) shall retain any ballast water until it exits the Seaway.
 - g) These requirements do not apply to ships of the armed forces, as defined in the Federal Water Pollution Control Act, or that are owned or operated by a state and used in government non-commercial service.
- (2) To obtain clearance to transit the Seaway:
- (a) every ship entering the Seaway after operating beyond the exclusive economic zone must agree to comply with the “Code of Best Practices for Ballast Water Management” of the Shipping Federation of Canada dated September 28, 2000, while operating anywhere within the Great Lakes and the Seaway; and
 - (b) every other ship entering the Seaway that operated within the Great Lakes and the Seaway must agree to comply with the “Voluntary Management Practices to Reduce the Transfer of Aquatic Nuisance Species Within the Great Lakes by U.S. and Canadian Domestic Shipping” of the Lake Carriers Association and Canadian Shipowners Association dated January 26, 2001, while operating anywhere within the Great Lakes and the Seaway.
 - (c) For copies of the “Code of Best Practices for Ballast Water Management” and of the “Voluntary Management Practices to Reduce the Transfer Of Aquatic Nuisance Species within the Great Lakes by U.S. and Domestic Shipping” refer to the St. Lawrence Seaway website at www.greatlakes-seaway.com

For details refer to Ship Transit and Equipment Requirements item 30 “Ballast Water Tank Information”

Meeting and Passing

31. (1) The *Collision Regulations* and the United States *Inland Rules* apply in respect of the meeting and passing of ships.
- (2) No ship shall meet another ship within the area between the caution signs at bridges or within any area that is designated as a no meeting area by signs erected by the Manager or the Corporation in that area.
- (3) Except as instructed by the traffic controller, no ship shall overtake and pass or attempt to overtake and pass another ship
- (a) in any canal;
- (b) within 600 m of a canal or lock entrance; or
- (c) after the order of passing through has been established by the ship traffic controller.

Cargo Booms - Deck Cargo

32. (1) Every ship shall have cargo booms secured in a manner that affords maximum visibility from the wheelhouse.
- (2) Cargo or containers carried, forward or aft, on deck shall be stowed in a manner that
- (a) affords an unrestricted view from the wheelhouse for the purpose of navigation; and
- (b) does not interfere with mooring equipment.
- (3) Seaway Traffic Control Centre shall be notified of the height of deck cargo prior to transiting the Seaway or when departing from a Port or Wharf within the Seaway.

Special Instructions

33. No ship of unusual design, ship or part of a ship under tow or ship whose dimensions exceed the maximum ship dimensions prescribed in section 3 shall transit the Seaway except in accordance with special instructions of the Manager or the Corporation given on the application of the representative of the ship.

Ships in Tow

34. No ship that is not self-propelled (including but not limited to tug/tows and/or deadship/tows) shall be underway in any Seaway waters unless it is securely tied to an adequate tug or tugs, in accordance with special

instructions given by the Manager or the Corporation pursuant to section 33 and must be equipped with an operational anchor. **Refer to section 49.**

Every ship in tow has to be inspected prior to every transit unless it has a valid Seaway Inspection Certificate. The owner/master shall give a 24 hour notice of arrival when an inspection is required. **For details refer to section 79 2 (d).**

Navigation Underway

35. Every ship transiting between calling-in point 2 and Tibbetts Point and between calling-in points 15 and 16 shall
- (a) man the propulsion machinery of the ship, including the main engine control station;
 - (b) operate the propulsion machinery so that it can respond immediately through its full operating range;
 - (c) man the wheelhouse of the ship at all times by either the master or certified deck officer, and a helmsman, and;
 - (d) have sufficient well rested crewmembers available for mooring operations and other essential duties.

Order of Passing Through

36. Ships shall advance to a lock in the order instructed by the traffic controller.

Mooring at Tie-Up Walls

37. (1) Upon arrival at a lock, a ship awaiting instructions to advance shall moor at the tie-up wall, close up to the designated limit of approach sign or to the ship preceding it, whichever is specified by the traffic controller or an officer.
- (2) Crew members being put ashore on landing booms and handling mooring lines on tie-up walls shall wear approved personal floatation devices.

Limit of Approach to a Lock

38. A ship approaching a lock shall comply with directions indicated by the signal light system associated with the lock and in no case shall its stem pass the designated limit of approach sign while a red light or no light is displayed.

Preparing Mooring Lines for Passing Through

39. Before a ship enters a lock,
- (a) winches shall be capable of paying out and heaving in at a minimum speed of 46 m per minute; and

- (b) the eye of each mooring line shall be passed outward through the fairleads at the side.

Raising Fenders

- 39.1 Every ship equipped with fenders that are not permanently attached shall raise its fenders when passing a lock gate in Snell or Eisenhower Locks.

Entering, Exiting or Position in Lock

- 40. (1) Unless directed by the Manager and the Corporation, no ship shall proceed into a lock in such a manner that the stem passes the stop symbol on the lock wall nearest the closed gates.
- (2) On being cast off in a lock, no ship shall be allowed to fall back in such a manner that the stern passes the stop symbol on the lock wall nearest the closed gates.
- (3) Every ship proceeding into a lock shall be positioned and moored as directed by the officer in charge of the lock
- (4) No ship shall use thrusters when passing a lock gate or a Hands Free Mooring (HFM) unit.

Tandem Lockage

- 41. Where two or more ships are being locked together, ships astern of the leading ship shall
 - a) come to a full stop a sufficient distance from the preceding ship to avoid a collision; and
 - b) be moved into mooring position as directed by the officer in charge of the lock.

Passing Hand Lines

- 42. (1) At locks, hand lines shall be secured to the mooring lines and passed as follows:
 - (a) a downbound ship shall use its own hand lines, secured to the eye at the end of the mooring lines by means of a bowline, which hand lines shall be passed to the linehandlers at the lock as soon as the ship passes the open gates;
 - (b) hand lines shall be passed to upbound ships by the linehandlers as soon as the ship passes the open gates, and secured, by means of a clove hitch, to the mooring lines 60 cm behind the splice of the eye;

(c) at Iroquois Lock and Lock 8, Welland Canal, both upbound and downbound ships shall use their own hand lines as provided in paragraph (a); and

(d) upbound ships of overall length in excess of 218 m in Locks 4 and 5, Welland Canal, shall secure the hand line to the eye of the No.1 mooring wire by means of a bowline.

(2) Mooring lines shall not be passed over the side of a ship in a manner dangerous to a lock crew.

Mooring Table

43. Unless otherwise directed by an officer, ships passing through the locks shall moor at the side of the tie-up wall or lock as shown in the table to this section.

MONTREAL TO IROQUOIS

Mooring in Locks

44. (1) The primary means of securing ships in the locks is by way of the Hands-Free Mooring (HFM) system. Ships being moored by HFM must have a minimum of one well rested crew member on deck during the lockage to assist the Bridge team.
- (2) Single tugs, tug/barge combinations, and small ships (less than 160m in overall length) that are not eligible to use HFM are to be processed without mooring lines at the Canadian Locks with the exception of upbound lockages at Locks 4, 5 and 6 in the Welland Canal.
- (3) Ships requiring the use of mooring lines shall be processed as follows:
- (a) Mooring lines shall only be placed on mooring posts as directed by the officer in charge of the mooring operation.
 - (b) No winch from which a mooring line runs shall be operated until the officer in charge of a mooring operation has signalled that the line has been placed on a mooring post.
 - (c) Once the mooring lines are on the mooring posts, lines shall be kept slack until the “all clear” signal is given by the lock personnel. When casting off signal is received mooring lines shall be kept slack until the “all clear” signal is given by the lock personnel.
 - (d) Ships being moored by “Hands Free Mooring” system (HFM) or passing through a lock without the use of mooring lines shall have a minimum of one (1) well rested crew member on deck during the lockage to assist the Bridge team.

Emergency Procedure

45. When the speed of a ship entering a lock chamber has to be checked the master shall take all necessary precautions to stop the ship in order to avoid contact with lock structures. At no time shall the ship deploy its anchors to stop the ship when entering a lock chamber.

Attending Lines

46. (1) Lines of a ship shall be under visual control and attended by members of its crew during the time the ship is passing through a lock.
- (2) While a ship is within a lock chamber and lines are hand held for tension control, each line shall be attended by at least one member of the ship's crew.

- (4) Mooring lines on deck must be individually attended unless the ship is equipped with side control and visual contact must be maintained for signal from lock employees taking or letting go mooring lines.

Leaving a Lock

47. (1) Mooring lines shall only be cast off as directed by the officer in charge of a mooring operation.
- (2) No ship shall proceed out of a lock until the exit gates, ship arresters and the bridge, if any, are in a fully open position and the lock operator gives the “all clear” instruction.
- (3) When “Hands Free Mooring” system (HFM) is used no ship shall use its engine(s) until the lock operator provides the “all clear” instruction.

Turning Basins

48. No ship shall be turned about in any canal, except
- (a) with permission from the traffic controller; and
- (b) at the locations set out in the table to this section.

TURNING BASINS	
South Shore Canal:	
a) Turning Basin No. 1	- Opposite Brossard
b) Turning Basin No. 2	- Immediately below Côte Ste. Catherine Lock
Welland Canal:	
a) Turning Basin No. 1	Between Lock 7 and the Guard Gate Cut for ships up to 180 m in overall length
b) Turning Basin No. 2	- Immediately south of Port Robinson (mile 13)
c) Turning Basin No. 3	- North of Lock No. 8 for ships up to 170 m in overall length
d) For ships up to 80 m in overall length	
(i) North end of Wharf No. 1	
(ii) Tie-up wall above Lock 1,	
(iii) Tie-up wall below Lock 2,	
(iv) Wharf No. 9,	
(v) Between the southerly extremities of Wharves 18-2 and 18-3	

Dropping Anchor or Tying to Canal Bank

49. Except in an emergency, no ship shall drop anchor in any canal or tie-up to any canal bank unless authorized to do so by the traffic controller.

Every anchor shall be suitably rigged for immediate release, holding and efficient retrieval.

Anchorage Areas

50. Except in an emergency, or unless authorized to do so by the traffic controller, no ship shall drop anchor in any part of the Seaway except in the following designated anchorage areas:
- (a) Point Fortier (Lake St. Louis)
 - (b) Melocheville (Beauharnois Canal)
 - (c) St. Zotique, Dickerson Island and Stonehouse Point (Lake St. Francis)
 - (d) Wilson Hill Island and Morrisburg (Lake St. Lawrence)
 - (e) Prescott, Union Park and Carlton Island (St. Lawrence River)
 - (f) Off Tibbetts Point (Lake Ontario)
 - (g) Off Port Weller (Lake Ontario)
 - (h) Off Port Colborne (Lake Erie)

Signalling Approach to a Bridge

51. (1) Unless a ship's approach has been recognized by a flashing signal, the master shall signal the ship's presence to the bridge operator by VHF radio when it comes abreast of any of the bridge whistle signs.
- (2) The signs referred to in subsection (1) are placed at distances varying between 550 m and 2990 m upstream and downstream from moveable bridges at sites other than lock sites.

Limit of Approach to a Bridge

52. (1) No ship shall pass the limit of approach sign at any moveable bridge until the bridge is in a fully open position and the signal light shows green.
- (2) No ship shall pass the limit of approach sign at the twin railway bridges on the South Shore Canal at Kahnawake, until both bridges are in a fully open position and both signal lights show green.

Obstructing Navigation

53. No ship shall be operated, drop anchor or be fastened or moored in a manner that obstructs or hinders navigation.

Interference with Navigation Aids

54. (1) Aids to navigation shall not be interfered with or used as moorings.
- (2) No person shall, unless authorized by the Manager or the Corporation, set out buoys or navigation markers on the Seaway.

Searchlights

55. No searchlight shall be used in such a manner that its beam interferes with the operators at a Seaway structure or on any ship.

Damaging or Defacing Seaway Property

56. The master of every ship shall
- (a) navigate so as to avoid damage to Seaway property; and
- (b) prevent defacement of Seaway property by any member of the ship's crew.

Disembarking or Boarding

57. (1) Except as authorized by an officer, no person, other than a member of the crew of a ship passing through, shall disembark or board any ship while the ship is passing through.
- (2) No member of the crew of a ship passing through shall disembark or board except for the purpose of carrying out essential duties as directed by the Master.
- (3) Persons disembarking or boarding shall be assisted by a member of the ship's crew under safe conditions.
- (4) Persons intending on disembarking or boarding a ship shall only do so after they have confirmed with the Captain that the ship is fully secured in the lock with Hands-Free Mooring or with mooring lines.

Pleasure Craft Scheduling

58. (1) The transit of pleasure craft shall be scheduled by the traffic controller or the officer in charge of a lock and may be delayed so as to avoid interference with other ships; and
- (2) Every pleasure craft seeking to transit Canadian Locks shall first make a reservation on the Seaway website.

Pollution

59. (1) No ship shall
- (a) emit sparks or excessive smoke; or
 - (b) blow boiler tubes.
- (2) No ship shall discharge into Seaway waters any substance not in conformity with applicable United States Federal Regulations and Canadian Regulations with the exception of the waters of the Welland Canal where two specific zones are established in which no substance shall be discharged, namely,
- (a) from lock 7 (Thorold) to mile 17 (Welland); and
 - (b) from lock 8 (Port Colborne) to the outer Port Colborne Piers (Lake Erie).
- (3) A record shall be kept by the ship of each location within the Seaway or adjacent waters where bilge water has been discharged.
- (4) Except as authorized by the Manager or the Corporation, no ship shall discharge garbage, ashes, ordure, litter or other materials.
- (5) Except as authorized by the Manager or the Corporation, no over the side painting shall be allowed in the Seaway.

PART IV - RADIO COMMUNICATIONS

Listening Watch and Notice of Arrival

60. (1) Ships shall be on radio listening watch on the applicable assigned frequency while within a Seaway traffic control sector as shown on the General Seaway Plan and shall give notice of arrival in the manner prescribed in section 64 upon reaching any designated calling in point.
- (2) Notice of arrival shall be deemed to have been given when it is acknowledged by a Seaway station.

Assigned Frequencies

61. The Seaway stations operate on the following assigned VHF frequencies:
- (a) 156.8 MHz (channel 16) Distress and calling;
 - (b) 156.7 MHz (channel 14) Working (Canadian stations in Sector 1 and the Welland Canal);
 - (c) 156.65 MHz (channel 13) Working (U.S. station in Lake Ontario);
 - (d) 156.6 MHz (channel 12) Working (U.S. station in Lake Ontario);
 - (e) 156.6 MHz (channel 12) Working (U.S. stations in Sector 2 of the River); and
 - (f) 156.55 MHz (channel 11) Working (Canadian stations in Sector 3, Lake Ontario and Lake Erie).

Seaway Stations

62. The Seaway stations are located as follows:

VDX20 (Seaway Beauharnois)	Upper Beauharnois Lock	Traffic Control Sector No.1
KEF (Seaway Eisenhower)	Eisenhower Lock	Traffic Control Sector No.2
VDX21 (Seaway Iroquois)	Iroquois Lock	Traffic Control Sector No.3
WAG (Seaway Clayton)	Clayton, N.Y.	Traffic Control Sector No. 4
WAG (Seaway Sodus)	Sodus, N.Y.	Traffic Control Sector No. 4
VDX72 (Seaway Newcastle)	Port Hope, Ontario	Traffic Control Sector No. 5
VDX70 (Seaway Newcastle)	Port Weller, Ontario	Traffic Control Sector No. 5
VDX22 (Seaway Welland)	St. Catharines, Ontario	Traffic Control Sector No. 6
VDX68 (Seaway Long Point)	Port Colborne, Ontario	Traffic Control Sector No. 7

Radio Procedures

63. Every ship shall use the channels of communication in each control sector as listed in the table to this section.

CHANNELS OF COMMUNICATION					
STATION	CONTROL SECTOR NUMBER	SECTOR LIMITS	CALL IN	WORK	LISTENING WATCH
Seaway	1	C.I.P. No. 2 to	Ch. 14	Ch. 14	Ch. 14
Beauharnois		C.I.P. No. 6-7			
Seaway	2	C.I.P. No. 6-7 to	Ch. 12	Ch. 12	Ch. 12
Eisenhower		C.I.P. No. 10-11			
Seaway	3	C.I.P. No. 10-11	Ch. 11	Ch. 11	Ch. 11
Iroquois		to Crossover Island			
Seaway	4	Crossover Island to	Ch. 13	Ch. 13	Ch. 13
Clayton		Cape Vincent			
Seaway	4	Cape Vincent to	Ch. 12	Ch. 12	Ch. 16
Sodus		Mid Lake Ontario			
Seaway	5	Mid Lake Ontario	Ch. 11	Ch. 11	Ch. 16
Newcastle		to C.I.P. No. 15			
Seaway	6	C.I.P. No. 15 to	Ch. 14	Ch. 14	Ch. 14
Welland		C.I.P. No. 16			
Seaway	7	C.I.P. No. 16 to	Ch. 11	Ch. 11	Ch. 16
Long Point		Long Point			

Calling In

64. (1) Every ship, intending to transit or in transit, shall report on the assigned frequency to the designated Seaway station when opposite any calling in point or checkpoint (indicated on the General Seaway Plan) and, when reporting, shall give the information indicated in Schedule III.
- (2) Changes in information provided under subsection (1), including updated ETAs that vary from the ETAs provided under the subsection by 30 minutes or more, shall be reported to the appropriate Seaway station.
- (3) A downbound ship in St. Lambert Lock shall switch to channel 10 (156.5 MHz) for a traffic report from Quebec Ship Traffic Management Centre.
- (4) After obtaining the situation report referred to in subsection (3), the downbound ship shall return to guarding channel 14 (156.7 MHz) and remain on that channel until it is clear of St. Lambert Lock chamber.

- (5) When the downbound ship has cleared the downstream end of the lower approach wall of St. Lambert Lock, the master of the ship shall call "Seaway Beauharnois" and request permission to switch to channel 10 (156.5 MHz).
- (6) Seaway Beauharnois shall grant the permission requested pursuant to subsection (5) and advise the downbound ship of any upbound traffic that may be cleared for Seaway entry but not yet at C.I.P. 2.
- (7) In the event of an expected meeting of ships between the downstream end of the lower approach wall and C.I.P. 2, the downbound ship shall remain on channel 14 (156.7 MHz) until the meeting has been completed.
- (8) After the meeting, the downbound ship shall call "Seaway Beauharnois" before switching to channel 10 (156.5 MHz).

Communication - Ports, Docks and Anchorages

65. (1) Every ship entering or leaving a lake port shall report to the appropriate Seaway station at the following check points:
 - (a) for the lake ports of Toronto and Hamilton, 1 nautical mile outside of the harbour limits; and
 - (b) for other lake ports, when crossing the harbour entrance.
- (2) Every ship arriving at a port, dock or anchorage shall report to the appropriate Seaway station, giving an estimated time of departure if possible, and, at least four hours prior to departure, every ship departing from a port, dock or anchorage shall report in the same way giving its destination and the expected time of arrival at the next check point.
- (3) Every ship prior to departing from a port, dock or anchorage shall report to the appropriate Seaway station its destination and its expected time of arrival at the next check point.
- (4) Every ship intending to conduct a dive operation and/or Remotely Operated Vehicle (ROV) inspection at a dock, wharf or approach wall shall provide a 24-hour minimum notice of diving operations to the appropriate Seaway Traffic control Centre.

PART V - DANGEROUS CARGO

Applicable Laws

66. (a) Ships carrying a cargo or part cargo of fuel oil, gasoline, crude oil or other flammable goods in bulk, including empty tankers which are not gas free,

and ships carrying dangerous substances whether break-bulk or containerized to which regulations made under the *Canada Shipping Act (2001)* or under the *Transportation of Dangerous Goods Act* or to which the *Dangerous Cargo Act* or the *Hazardous Materials Transportation Act* of the United States or regulations issued pursuant thereto apply, shall be deemed to carry dangerous substances and shall not transit unless all requirements of the said Statutes and regulations and of these Practices and Procedures have been fulfilled.

- (b) Every ship carrying dangerous cargo, as described in this Part, and all tankers carrying liquid cargo in bulk shall file with the Manager and the Corporation a copy of the current load plan described in subsection 72(5).

Explosive Ships

- 67. A ship carrying explosives, either Government or commercial, as defined in the Dangerous Cargo Act of the United States and in the International Maritime Dangerous Goods Code, Class 1, Divisions 1.1 to 1.5 inclusive, shall be deemed for the purpose of these Practices and Procedures to be an explosive ship.

Explosives Permission Letter

- 68. (1) A Seaway Explosives Permission Letter is required for an explosive ship in the following cases:
 - (a) for all ships carrying any quantity of explosives with a mass explosive risk, up to a maximum of 2 tonnes (IMO Class 1, Division 1.1 and 1.5);
 - (b) for all ships carrying more than 10 tonnes and up to a maximum of 50 tonnes of explosives that do not explode en masse (IMO Class 1, Division 1.2);
 - (c) for all ships carrying more than 100 tonnes and up to a maximum of 500 tonnes of explosives having a fire hazard without explosive effect (IMO Class 1, Division 1.3); and
 - (d) for all ships carrying more than 100 tonnes and up to a maximum of 500 tonnes of safety explosives and shop goods (IMO Class 1, Divisions 1.4).
- (2) When an explosive ship is carrying quantities of explosives above the maximum mentioned in subsection (1), no Seaway Explosives Permission Letter shall be granted and the ship shall not transit.
- (3) A written application for a Seaway Explosives Permission Letter certifying that the cargo is packed, marked and stowed in accordance

with the *Transportation of Dangerous Goods Regulations (Canada)*, the United States regulations under the *Dangerous Cargo Act* and the *International Maritime Dangerous Goods Code* may be made to The St. Lawrence Seaway Management Corporation, 202 Pitt Street, Cornwall, Ontario, K6J 3P7, or to the Great Lakes St. Lawrence Seaway Development Corporation, P.O. Box 520, Massena, New York, U.S.A., 13662.

- (4) A signed copy of a Seaway Explosives Permission Letter and a true copy of any certificate as to the loading of dangerous cargo shall be kept on board every explosive ship in transit and shall be made available to any officer requiring production of such copies.

Hazardous Cargo Ships

69. For the purpose of these Practices and Procedures, a ship shall be deemed to be a hazardous cargo ship in the following cases:
- (a) a tanker carrying fuel oil, gasoline, crude oil or other flammable liquids in bulk, having a flashpoint below 61°C, including a tanker that is not gas free where its previous cargo had a flashpoint below 61°C;
 - (b) a tanker carrying compressed liquefied gases, bulk acids or liquefied chemicals;
 - (c) a dry cargo ship carrying the following dangerous substances, whether in bulk, break-bulk or containerized, that are
 - (i) in excess of 50 tonnes of gases, compressed, liquefied or dissolved under pressure (IMO Class 2),
 - (ii) in excess of 50 tonnes of flammable liquids having a flashpoint below 61°C (IMO Class 3),
 - (iii) in excess of 50 tonnes of flammable solids, spontaneously combustible material or substances emitting combustible gases when wet (IMO Class 4),
 - (iv) in excess of 50 tonnes of oxidizing substances or organic peroxides (IMO Class 5),
 - (v) any quantity of poisonous (toxic) substances and infectious substances (IMO Class 6),
 - (vi) any quantity of radioactive substances (IMO Class 7),
 - (vii) in excess of 50 tonnes of corrosive substances (IMO Class 8),

- (viii) any quantity of metal turnings, borings, cuttings, or shavings, in bulk having a temperature on loading or in transit in excess of 65.5°C.
- (ix) any quantity of grain that is under fumigation, where the chemical being used is hazardous to human life, and
- (x) any quantity of direct reduced iron (DRI).

Fendering - Explosive and Hazardous Cargo Ships

70. All explosive ships requiring a Seaway Explosives Permission Letter in accordance with Section 68 and all tankers carrying cargo with a flashpoint of up to 61°C, except those carrying such cargo in centre tanks with gas free wing tanks, shall be equipped with a sufficient number of non-metallic fenders on each side to prevent any metallic part of the ship from touching the side of a dock or lock wall.

Signals - Explosive and Hazardous Cargo Ships

71. An explosive ship or hazardous cargo ship shall display at the masthead or at an equivalent conspicuous position a "B" flag.

Reporting - Explosive and Hazardous Cargo Ships

72. (1) Every explosive ship or hazardous cargo ship shall, when reporting information related to cargo as required by subsection 64(1), report the nature and tonnage of its explosive or hazardous cargo and the flashpoint of that cargo where applicable. Every ship carrying grain which is under fumigation shall declare to the nearest traffic control centre the nature of the fumigant, its properties and cargo holds affected.
- (2) Every explosive ship requiring a Seaway Explosives Permission Letter shall, when reporting in, give the number of its Seaway Explosives Permission Letter.
- (3) Every hazardous cargo ship carrying metal turnings, shavings, cuttings or borings in bulk shall, when reporting information related to cargo as required by subsection 64(1), give the high temperature reading of each compartment at that time, together with the high temperature reading in each compartment taken on completion of loading.
- (4) Every ship carrying radioactive substances shall, when reporting in, give the number and date of issue of any required certificate issued by the Canadian Nuclear Safety Commission (CNSC) and/or the US Nuclear Regulatory Commission (USNRC) authorizing such shipment.

- (5) Every ship carrying dangerous cargo, as described in section 66, and all tankers carrying liquid cargo in bulk, and all ships carrying grain under fumigation shall, prior to transiting any part of the Seaway, file with the Manager a copy of the current load plan that includes the following information:
 - (a) the name of the cargo, its IMO class and UN number as set out in the *International Maritime Dangerous Goods Code*, if applicable, or, if the cargo is not classed by the IMO and does not have a UN number, the words "NOT CLASSED";
 - (b) the approximate total weight in metric tonnes or total volume in cubic metres and the stowage location of each commodity;
 - (c) the approximate weight in metric tonnes or the approximate volume in cubic metres in each hold or tank;
 - (d) the flashpoint of the cargo, if applicable; and
 - (e) the estimated date of entry into the Seaway and the date and time that the load plan was last issued or amended;
 - (f) tankers in ballast shall report the previous cargo of each cargo hold on a plan as above.
- (6) For tankers, the information required under this section shall be detailed on a plan showing the general layout of the tanks, and a midships cross-section showing the double bottom tanks and ballast side tanks. For details refer to Ship Transit and Equipment Requirements.
- (7) If a Safety Data Sheet (SDS) on a hazardous cargo that a ship is carrying is not available in a Seaway Traffic Control Centre, the ship shall provide information enabling the preparation of an SDS.
- (8) Every ship shall submit its load plan to the nearest Seaway Traffic Control Centre from which it will be distributed to all other Seaway Traffic Control Centres. Any changes in stowage, including loading and discharging during a transit, the ship shall submit an updated plan before departing from any port between St. Lambert and Long Point.
- (9) Failure to comply with these requirements may result in unnecessary delays or transit refusal.

Cleaning Tanks - Hazardous Cargo Ships

73. (1) Cleaning and gas-freeing of tanks shall not take place
 - (a) in a canal or a lock;

- (b) in an area that is not clear of other ships or structures; and
- (c) before gas-freeing and tank cleaning has been reported to the nearest Seaway station.

Hot Work Permission

- (2) Before any hot work, defined as any work that uses flame or that can produce a source of ignition, cutting or welding, is carried out by any ship on any designated St. Lawrence Seaway Management Corporation (SLSMC) Approach walls or wharfs, a written request must be sent to the SLSMC, preferably 24 hours prior to the ship's arrival on SLSMC Approach walls or wharfs. The hot work shall not commence until approval is obtained from a SLSMC Traffic Control Centre.
 - (a) Permission is granted under the following conditions:
 - (i) Copy of ship's "Hot Work Permit" provided to SLSMC at (nrerie@seaway.ca & nrshipinspectors@seaway.ca) before welding commences;
 - (ii) Name of company performing the hot work;
 - (iii) Effective fire watch is maintained;
 - (iv) Welding operations shall temporarily cease during ship meets and lockages;
 - (v) Welding operations shall cease at the direction of a Traffic Controller; and
 - (vi) All sparks and/or flames to be contained on the ship.

Special Requirements for Tankers Performing Hot Work

- (3) Prior to arriving at any SLSMC designated Approach wall or wharf a tanker must be gas free or have tanks inerted. The gas-free certificate must be sent to the SLSMC Traffic Control Centre in order to obtain clearance for the ship to commence Hot Work.

PART VI - FEES ASSESSMENT AND PAYMENT

Transit Declaration

- 74. (1) A Seaway e-business Transit Declaration (Cargo and Passenger) shall be completed and submitted to the Manager by the representative of a ship, for each ship that has an approved preclearance except non cargo ships, within fourteen (14) days after the ship enters the Seaway on any upbound or downbound transit.
The e-business Transit Declaration must be filled directly on the St. Lawrence Seaway website at www.greatlakes-seaway.com and submitted from e-business.

- (2) The use of the Harmonized System (HS Codes) and the UN Location Codes on the e-business Transit Declaration is mandatory to identify cargo and ports respectively.
- (3) The loaded or manifest weight of cargo shall be shown on the Seaway e-business Transit Declaration, except in the case of petroleum products where gallonage meters are not available at the point of loading, in which case offloaded weights may be shown on the e-business Transit Declaration.
- (4) Where a ship carried cargo to or from an overseas port, an electronic copy of the cargo manifest, duly certified, shall be submitted with the Seaway e-business Transit Declaration.
- (5) A Weigh-Scale Certificate or similar document issued in the place of a cargo manifest or a bill of lading may be accepted in lieu thereof.
- (6) Where a submitted Seaway e-business Transit Declaration is found to be inaccurate concerning the destination, cargo or passengers, the representative shall immediately forward to the Manager, revision of the submitted Declaration.
- (7) Submitted Seaway e-business Transit Declarations shall be used in assessing fees in accordance with the *St. Lawrence Seaway Schedule of Tolls*, and fees invoice shall be forwarded to the representative or its designated agent.
- (8) Where government aid cargo is declared, appropriate Canadian or U.S. customs form or a stamped and signed certification letter from Canada or U.S. Customs must accompany the e-business Transit Declaration or notification must be made to the Manager.

Payment of Fees

75. (1) Every fee invoice shall be paid in Canadian funds, within 45 days after the ship enters the Seaway, and any adjustment of the amount payable shall be provided for in a subsequent invoice.
- (2) Fees, established by agreement between Canada and the United States, and known as the *St. Lawrence Seaway Schedule of Tolls*, shall be paid by pleasure crafts for the transits of each Canadian lock using the pleasure craft reservation system available on the Seaway web site. At U.S. locks, the fee is paid in U.S. funds or the pre-established equivalent in Canadian funds or through payment via [Pay.gov](https://www.pay.gov) on the Seaway web site.
 - (3) Fees for Seaway arranged security guard in compliance with Transport Canada Security regulations shall be paid in Canadian funds within 30 days of billing.

- (4) Ship representatives with past due invoices, unpaid after 45 days, may be subject to the suspension of preclearance for each ship of which a preclearance has been given and/or the immediate removal of the waived security for the fees set in subsections 26(3) and 26(4).

In-Transit Cargo

76. Cargo that is carried both upbound and downbound in the course of the same voyage shall be reported with the Seaway e-business Transit Declaration, but is deemed to be ballast and not subject to fee assessment.
77. (reserved)

PART VII - INFORMATION AND REPORTS

Required Information

78. (1) Documentary evidence, comprising inspection certificates, load line certificates, crew lists, dangerous cargo manifest and the cargo stowage plan, shall be carried on board and shall be made available to any officer requiring production of such evidence.
- (2) Documentary evidence, comprising evidence of cargo declared, cargo manifest, dangerous cargo manifest and bills of lading, shall be kept by the agent, owner or operator for a period of five years, or until an audit has been performed by the Manager or Corporation, whichever occurs first, and such documents shall be made available to an officer requiring production of such evidence.
- (3) When a Declaration of Security (DoS) is required between a ship and the St. Lawrence Seaway, it shall be completed prior to entry into the first lock and will remain in effect until the ship exits the St. Lawrence Seaway at the St. Lambert Lock or the Welland Canal at Port Colborne.

Copy of Declaration of Security can be found at

<https://greatlakes-seaway.com/en/commercial-shipping/seaway-security/>

Advance Notice of Arrival, Ships Requiring Inspection

79. (1) **USCG Advance Notice of Arrival** – All foreign flagged ships of 300 GRT or above intending to transit the Seaway shall submit one completed United States Coast Guard (USCG) Electronic Notice of Arrival (ENOA) prior to entering at call in point 2 (CIP 2) as follows:

If your voyage time to CIP 2 is 96 hours or more, you must submit an ENOA **96 hours** before entering the Seaway at CIP 2.

If your voyage time to CIP 2 is less than 96 hours, you must submit an ENOA before departure, but at least **24 hours** before entering the Seaway at CIP 2.

If there are changes to the ENOA, submit them as soon as practicable but at least 12 hours before entering the Seaway at CIP 2.

The NOA must be provided **electronically** following the USCG National Ship Movement Center's (NVMC) procedures (<http://www.nvmc.uscg.gov>).

To complete the ENOA correctly for Seaway entry, select the following:

- “CIP 2” as the Arrival Port,
- “Foreign to Saint Lawrence Seaway” as the Voyage Type, and
- “Saint Lawrence Seaway Transit” as the Arrival State, City and Receiving Facility.

(2) Foreign Ship Inspection program:

- (a) **Enhanced Ship Inspections (ESI)** – physical ship inspection: Foreign flagged ships are subject to a Seaway inspection once every two navigation seasons. Agents must provide an initial notice of inspection 120 hours prior to the ship's arrival at CIP2. (to: inspecteursvm@seaway.ca and to vtc@dot.gov)
- (b) Subject to satisfactory performance, a **Self-Inspection** may be permitted in the interim season. Ship to complete a Foreign Self Inspection report and submit electronically to inspecteursvm@seaway.ca and to vtc@dot.gov
- (c) The ESI or self-inspection is required on the first transit of the navigation season
- (d) **Inland Self Inspection:** Inland domestic ships which are approved by the Seaway and are ISM certified and have a company quality management system, must submit the “Self Inspection Report”, every 2 navigation seasons and not later than 30 days after “fit out”.
- (e) **Inland domestic ships not participating in the “Self Inspection Program”:** are subject to a Seaway inspection every 2 navigation seasons.
- (f) **Tug/barge combinations not on the “Seaway Approved Tow” list:** are subject to Seaway inspection prior to every transit of the Seaway unless provided with a valid Inspection Report for a round trip transit.
- (g) **A tall ship, passenger ship, or ship of an unusual design:** is subject to Seaway yearly Enhanced Ship inspection.

Reporting Dangerous Cargo

80. (1) The master of any explosive ship or hazardous cargo ship shall report to a Seaway station, as set out in Schedule III, the nature, quantity and IMO classification of the dangerous cargo and where it is stowed on the ship.
- (2) The master of any ship, that takes on explosive or hazardous cargo while in the Seaway, shall report to the nearest Seaway station at least four hours prior to commencing transit from a port, dock or wharf, the nature, quantity and IMO classification of the dangerous cargo and where it is stowed on the ship.
- (3) Ships carrying "Certain Dangerous Cargo" (CDC) as defined in the Transport Canada "Marine Transportation Security Regulations" (MTSR's) and the United States Coast Guard "Marine Transportation Security Act" shall report the "Certain Dangerous Cargo" to the nearest Seaway station prior to a Seaway transit.

Reporting an Accident or Dangerous Occurrence

81. (1) Where a ship on the Seaway is involved in an accident or a dangerous occurrence, the master of the ship shall report the accident or occurrence, pursuant to the requirements of the Transportation Safety Board Regulations, to the nearest Seaway station and Transport Canada Marine Safety and Security or U.S. Coast Guard office as soon as possible and prior to departing the Seaway system.
- (2) Where a ship approaching the Seaway with intent to transit has been involved in an accident in the course of its last voyage that might affect its ability to transit safely and expeditiously, the master of the ship shall report the accident to the nearest Seaway station before entering the Seaway.

Reporting Mast Height

82. A ship, any part of which extends more than 33.5 m above water level, shall not transit any part of the Seaway until precise information concerning the height of the ship has been furnished to the nearest Seaway station.

Reporting Position at Anchor, Wharf, etc.

83. A ship anchoring in a designated anchorage area, or elsewhere, and a ship mooring at a wharf or dock, tying-up to a canal bank or being held on a canal bank in any manner shall immediately report its position to the traffic controller and it shall not resume its voyage without the traffic controller's permission.

Reporting of Impairment or Other Hazard by Ships Transiting within the Seaway

84. While transiting the Seaway, the master of a ship shall immediately report to the nearest Seaway station:
- (a) any condition of the ship that might impair its ability to transit safely and expeditiously;
 - (b) any hazardous condition of the ship;
 - (c) any malfunction on the ship of equipment required by sections 5 to 21 and subsections (5) to (10) of Schedule I;
 - (d) any malfunction on the ship of equipment and machinery that is noted as operational in the current “Enhanced Ship Inspection” or “Self Inspection” of the ship;
 - (e) any difficulty on the part of the ship in controlling its tow or tows;
 - (f) any hazard, dangerous situation or malfunctioning aid to navigation which has not been published in a notice to mariners;
 - (g) any loss of anchor with particulars of the precise location of the loss; and
 - (h) any location where visibility is less than one nautical mile.

**Reporting of Impairment or Other Hazard by
Ships Intending to Transit the Seaway**

85. The master of any ship which intends to transit the Seaway shall report to the nearest Seaway station, prior to entering the Seaway, any of the conditions set out in paragraphs 84 (a) to (d).

**PART VIII - DETENTION AND SALE IN U.S. WATERS
(The *Canada Marine Act* applies in Canadian waters)**

Security for Damages or Injury

86. An officer may detain a ship that causes
- (a) damage to property of the Corporation;
 - (b) damage to goods or cargo stored on property of the Corporation; or
 - (c) injury to employees of the Corporation; until security satisfactory to the Corporation has been provided.

Detention for Fee Arrears or Violations

87. (1) An officer may detain a ship where
- (a) the fees levied against the ship have not been paid; or
 - (b) a violation of these Practices and Procedures or U.S. Seaway Regulations has taken place in respect of the ship.
- (2) A ship detained pursuant to paragraph (1) (a) shall be released when the unpaid fees are paid.
- (3) A ship detained pursuant to paragraph (1) (b) may be released when a sum of money in an amount, determined by the Corporation to be the maximum fine or civil penalty that may be imposed for the violation in respect of which the ship has been detained, is deposited with the Corporation as security for the payment of any fine or civil penalty that may be imposed.
- (4) Where a sum of money has been deposited pursuant to subsection (3), the Corporation may
- (a) return the deposit;
 - (b) hold the deposit in trust as security for the payment of any fine that may be imposed; or
 - (c) retain the deposit if the depositor agrees to retention by the Corporation of the sum deposited.
- (5) Although the depositor may have agreed to retention by the Corporation of an amount deposited under subsection (3), he may bring an action for the recovery of the amount deposited on the ground that there has been no violation of these Practices and Procedures or U.S. Seaway Regulations.

Power of Sale for Fee Arrears

88. Where a ship has been detained pursuant to subsection 87(1) and payment of the fees or the fine imposed has not been made within a reasonable time after
- (a) the time of the detention, in the case of arrears of fees, or
 - (b) the imposition of the fine or penalty, in the case of a violation,

The Corporation may direct that the ship or its cargo or any part thereof be seized and sold subject to and in accordance with an order of a court of competent jurisdiction.

PART IX - GENERAL

Transit Refused

89. An officer may refuse to allow a ship to transit when
- (a) the ship is not equipped in accordance with sections 5 to 21 and subsections (5) to (10) of Schedule I when transiting the Canadian waters of the Seaway;
 - (b) the ship, its cargo, equipment or machinery are in a condition that will prevent safe or expeditious transit by that ship; or
 - (c) the ship is manned with a crew that is considered to be incompetent or inadequate.
 - (d) the ship is not in compliance with Transport Canada Marine Safety and Security, flag state and/or classification society regulations.

Boarding for Inspection

90. (1) For the purpose of enforcing these Practices and Procedures, in both Canadian and U.S. waters, an officer may board any ship and
- (a) examine the ship, its equipment and cargo; and
 - (b) determine that the ship is adequately manned.
- (2) In addition to subsection 90(1) (a) and 90(1) (b) in Canadian waters, a Manager's officer may also
- (a) require any person appearing to be in charge of the ship to produce for inspection, or for the purpose of making copies or extracts, any log book, document or paper;
 - (b) in carrying out an inspection, a Manager's officer may
 - (i) use or cause to be used any computer system or data processing system on the ship to examine any data contained in, or available to, the system;
 - (ii) reproduce any record, or cause it to be reproduced from the data, in the form of a print-out or other intelligible output and remove the print-out or other output for examination or copying; and
 - (iii) use or cause to be used any copying equipment on the ship to make copies of any books, records, electronic data or other documents.

- (c) In Canadian waters, the owner or person who is in possession or control of a ship that is inspected, and every person who is found on the ship, shall
 - (i) give the officer all reasonable assistance to enable the officer to carry out the inspection and exercise any power conferred by the *Canada Marine Act*, and
 - (ii) provide the officer with any information relevant to the administration of these practices and procedures that the officer may reasonable require.
- (3) Ships shall provide a safe and approved means of boarding. Pigeon holes are not accepted as a means of boarding and an alternate safe means of access shall be provided.

Removal of Obstructions

- 91. The Manager or the Corporation may, at the owner's expense, move any ship, cargo or thing that obstructs or hinders transit on any part of the Seaway.

Wintering and Laying-Up

- 92. No ship shall winter within the Seaway or lay-up within the Seaway during the navigation season except with the written permission of the Manager or the Corporation and subject to the conditions and charges that may be imposed.

Access to Seaway Property

- 93. (1) Except as authorized by an officer, no person shall load or unload goods on property of the Manager or the Corporation.
- (2) Except as authorized by an officer or by the *Seaway Property Regulations* or its successors no person shall enter upon any land or structure of the Manager or the Corporation or in any Seaway canal or lock area.

Keeping Copies of Documents

- 94. (1) A copy of these *Practices and Procedures*, a copy of the ship's valid Ship Inspection Report and the Seaway Notices for the current navigation year shall be kept on board every ship in transit. For the purposes of section 94 (1) a copy may be kept in either paper or electronic format so long as it can be accessed in the wheelhouse.
- (2) Onboard every ship transiting the Seaway a duplicate set of the Ship's Fire Control Plans shall be permanently stored in a prominently marked weather-tight enclosure outside the deckhouse for the assistance of shore side fire-fighting personnel.

Compliance with Practices and Procedures

95. The master or owner of a ship shall ensure that all requirements of these Practices and Procedures and Seaway Notices applicable to that ship are complied with.

PART X - NAVIGATION CLOSING PROCEDURES

Interpretation

96. In this Part,

«**clearance date**» means the date designated in each year by the Manager and the Corporation as the date by which ships must report at the applicable calling in point referred to in subsection 97(3) for final transit of the Montreal-Lake Ontario Section of the Seaway; (*date-limite*)

«**closing date**» means the date designated in each year by the Manager and the Corporation as the date on which the Seaway is closed to ships at the end of the navigation season; (*date de fermeture*)

«**closing period**» means the period that commences on the date designated in each year by the Manager and the Corporation as the date on which the closing procedures in section 97 apply and that ends on the closing date; (*période de fermeture*)

«**Montreal-Lake Ontario Section of the Seaway**» means the portion of the Seaway between the Port of Montreal and mid-Lake Ontario; (*section Montréal-lac Ontario de la voie maritime*)

«**wintering ship**» means a ship that enters the Seaway upbound after a date designated each year by the Manager and the Corporation and transits above Iroquois Lock. (*navire hivernant*)

Closing Procedures and Ice Navigation

97. (1) No wintering ship shall return downbound through the Montreal-Lake Ontario Section of the Seaway in the same navigation season in which it entered the Seaway unless the transit is authorized by the Manager and the Corporation.
- (2) No ship shall transit the Montreal-Lake Ontario Section of the Seaway during the closing period in a navigation season unless
- (a) it reports at the applicable calling in point referred to in subsection (3) on or before the clearance date in that navigation season; or

- (b) it reports at the applicable calling in point referred to in subsection (3) within a period of 96 hours after the clearance date in that navigation season, it complies with the provisions of the agreement between Canada and the United States known as the *St. Lawrence Seaway Schedule of Tolls* and the transit is authorized by the Manager and the Corporation.
- (3) For the purposes of subsection (2), the calling in point is,
 - (a) in the case of an upbound ship, Cap St. Michel; and
 - (b) in the case of a downbound ship, Cape Vincent.
- (4) No ship shall transit the Montreal/Lake Ontario Section of the Seaway after the period of 96 hours referred to in paragraph (2)(b) unless the transit is authorized by the Manager and the Corporation.
- (5) Every ship that, during a closing period, enters the Montreal/Lake Ontario Section of the Seaway, upbound or downbound, or departs upbound from any port, dock, wharf or anchorage in that Section shall,
 - (a) at the time of such entry or departure, report to the nearest station the furthestmost destination of the ship's voyage and any intermediate destinations within that Section; and
 - (b) at the time of any change in those destinations, report such changes to the nearest Seaway station.
- (6) Where ice conditions restrict navigation,
 - (a) no upbound ship that has a power to length ratio of less than 24:1(kW/metre) and a forward draft of less than 50 dm, and
 - (b) no downbound ship that has a power to length ratio of less than 15:1 (kW/metre) and a forward draft of less than 25 dm

shall transit between the St. Lambert Lock and the Iroquois Lock of the Montreal/Lake Ontario Section of the Seaway and CIP 15 and CIP 16 of the Welland Canal.

SCHEDULE I
(Sections 21, 84 and 89)

SHIPS TRANSITING U.S. WATERS

No ship of 1600 gross tons or more shall transit the U.S. Waters of the St. Lawrence Seaway unless it is equipped with the following manoeuvring data and equipment:

- (1) Charts of the Seaway that are currently corrected and of large enough scale and sufficient detail to enable safe navigation. These may be published by a foreign government if the charts contain similar information to those published by the U.S. Government.
- (2) U.S. Coast Guard Light List, currently corrected.
- (3) U.S. Coast Pilot, current edition.
- (4) Current Seaway Notices Affecting Navigation.
- (5) The following manoeuvring data prominently displayed on a fact sheet in the wheelhouse:
 - (a) for full and half speed, a turning circle diagram to port and starboard that shows the time and distance of advance and transfer required to alter the course 90 degrees with maximum rudder angle and constant power settings;
 - (b) the time and distance to stop the ship from full and half speed while maintaining approximately the initial heading with maximum application of rudder;
 - (c) for each ship with a fixed propeller, a table of shaft revolutions per minute, for a representative range of speeds, and a notice showing any critical range of revolutions at which the engine designers recommend that the engine not be operated on a continuous basis;
 - (d) for each ship that is fitted with a controllable pitch propeller, a table of control settings for a representative range of speeds;
 - (e) for each ship that is fitted with an auxiliary device to assist in manoeuvring, such as a bow thruster, a table of ship speeds at which the auxiliary device is effective in manoeuvring the ship;
 - (f) the manoeuvring information for the normal load and normal ballast condition for
 - (i) calm weather - wind 10 knots or less, calm sea;

- (ii) no current;
 - (iii) deep water conditions water depth twice the ship's draft or greater; and
 - (iv) clean hull;
- (g) at the bottom of the fact sheet, the following statement:

WARNING

"The response of the (name of the ship) may be different from the above if any of the following conditions, on which the manoeuvring is based, are varied:

- (a) *calm weather wind 10 knots or less, calm sea;*
 - (b) *no current;*
 - (c) *deep water conditions water depth twice the ship's draft or greater;*
 - (d) *clean hull;*
 - (e) *intermediate drafts or unusual trim."*
- (6) Illuminated magnetic compass at the main steering station with compass deviation table, graph or record.
- (7) Gyro-compass with illuminated gyro-repeater at the main steering station.
- (8) Marine radar system for surface navigation. Additionally, ships of 10,000 gross tons or more must have a second main radar system that operates independently of the first.
- (9) Efficient echo sounding device.
- (10) Illuminated rudder angle indicator or repeaters that are
- (a) located in the wheelhouse; and
 - (b) arranged so that they can easily be read from any position on the bridge.
- (11) Illuminated indicator showing the operating mode of that device when ship is equipped with auxiliary manoeuvring devices.

SCHEDULE II - TABLE OF SPEEDS ¹
(Section 28)

COLUMN I – FROM	COLUMN II – To	MAXIMUM SPEED OVER THE BOTTOM (KNOTS)	
		COLUMN III	COLUMN IV
1. Upper Entrance South Shore Canal Buoy A1	Lake St. Louis Buoy A13	10.5	10.5
2. Lake St. Louis Buoy A13	Lower Entrance Lower Beauharnois Lock	12 (upb) 14 (dnb)	11 (upb) 13 (dnb)
3. Upper Entrance Upper Beauharnois Lock	Lake St. Francis Buoy D1	9 (upb) 10.5 (dnb)	9 (upb) 10.5 (dnb)
4. Lake St. Francis Buoy D1	Lake St. Francis Buoy D49	12(upd) 13.5(dnb)	12 13.5 (dnb)
5. Lake St. Francis Buoy D49	Snell Lock	8.5 (upb) 10.5 (dnb)	8 (upb) 10.5 (dnb)
6. Eisenhower Lock	Iroquois Lock	11.5	10.5
7. Iroquois Lock	McNair Island Light Buoy 137A	13	10.5
8. McNair Island Light Buoy 137A	Deer Island Lt. 186	11.5	10.5
9. Deer Island Lt. 186	Bartlett Point Lt. 227	8.5 (upb) 10.5 (dnb)	8 (upb) 10.5 (dnb)
10. Bartlett Point Lt. 227	Tibbetts Point Traffic Lighted Buoy Mo (A)	13	10.5
11. Junction of Canadian Middle Channel and Main Channel abreast of Ironsides Island	Open waters between Wolfe and Howe Islands through the Canadian Middle Channel	9.5	9.5
12. Port Robinson	Ramey's Bend through the Welland By-Pass	8	8
13. All other canals		6	6

Maximum speeds at which a ship may travel in the identified area in both normal and high water conditions are set out in this schedule. The Manager and the Corporation will, from time to time, designate the set of speed limits that is in effect.

SCHEDULE III - CALLING IN TABLE

<u>C.I.P. and Check Point</u>	<u>Station to Call</u>	<u>Message Content</u>
UPBOUND SHIPS:

APPENDIX I

SHIP DIMENSIONS

Structures are located at a number of Seaway locks which, when fully raised, overhang the lock wall at a given point, thereby limiting:

- (a) the height of a ship above the water line measured at the ship's side; and
- (b) the height of other structures that are located near the sides of the ship, such as derricks, crosstrees, antennas, etc.

The following block diagram shows the limits beyond which a ship's hull or superstructure cannot extend *when the ship is alongside the lock wall*. For details, refer to Ship Transit and Equipment Requirements.

The limits in the block diagram are based on ships with a maximum allowable beam of 23.2 m. For ships that have a beam width less than this and that have dimensions exceeding the limits of the block diagram (**measured with the ship alongside the lock wall**), a special permission to transit must be obtained. (Accurate measurements may be required before such permission is granted.)

Caution: Masters must take into account the ballast draft of the ship when verifying the maximum permissible dimensions. Bridge wings, antennas, masts and, in some cases, the Samson posts or store cranes could be outside the limits of the block diagram as indicated in Appendix 1 of the Seaway Handbook and could override the lock wall. Masters and pilots must take this into consideration and exercise extreme caution when entering or exiting locks to ensure that the ship does not contact any of the structures on the lock.

VESSEL DIMENSIONS
