Re : SEAWAY RADIO MESSAGE NO. 2 – 2025

Mariners are advised that the Montreal-Lake Ontario and Welland Canal drafts are as outlined in Seaway Notice No. 13 of 2025.

It is important for mariners to note that any vessel which enters the Seaway upbound at CIP2 after 2359 hrs on December 9th shall be designated a wintering vessel in accordance with all the terms outlined in Seaway Notice No. 14 of 2025.

In addition, the implementation of the power to length ratio restrictions and minimum draft requirements, scheduled for December 7, will be postponed until further notice.

Ice is forming at St. Lambert and Côte Ste. Catherine locks in the Montreal-Lake Ontario section, and in the Wiley-Dondero canal, more detailed information may be obtained from the respective Traffic Control Centre.

The Prescott/Ogdensburg ice boom installation is underway outside of the navigation channel only.

Water temperature at St. Lambert on December 09, is -0.2 degree Celsius. Last year's temperature was 2.1 degrees Celsius. The ten year average is 2.2 degrees Celsius.

At 23:59 December 08, the number of ocean vessels above St. Lambert was 47 as compared to 61 in 2024. Above Port Weller the number was 32 as compared to 39 in 2024.

All closing procedures outlined in Seaway Notice No. 14 of 2025 remain in effect.

The next radio message will be issued Wednesday, December 10, 2025.

The Seaway Control centre will only broadcast critical information on the air.
